MULTI-TIER DISCOUNT SYSTEM

```java
public class DiscountSystem {
    public static void main(String[] args) {

        double purchaseAmount = 6000;
        double discount;

        if (purchaseAmount < 1000) {
            discount = 0;
        } else if (purchaseAmount < 5000) {
            discount = 0.05;
        } else if (purchaseAmount < 10000) {
            discount = 0.10;
        } else {
            discount = 0.15;
        }

        double discountAmount = purchaseAmount * discount;
        double finalPrice = purchaseAmount - discountAmount;

        System.out.println("Purchase Amount: " + purchaseAmount);
        System.out.println("Discount: " + (discount * 100) + "%");
        System.out.println("Discount Amount: " + discountAmount);
        System.out.println("Final Price: " + finalPrice);
    }
}
```

```
Purchase Amount: 6000.0
Discount: 10.0%
Discount Amount: 600.0
Final Price: 5400.0
