PERSONAL PROFILE PRINTER

```java
public class PersonalProfilePrinter {
    public static void main(String[] args) {

        int age = 19;
        double height = 1.65;
        char initial = 'J';
        boolean isStudent = true;

        String fullName = "Jovelyn Lachica";

        System.out.println("=== PERSONAL PROFILE ===");
        System.out.println("Full Name: " + fullName);
        System.out.println("Age: " + age);
        System.out.println("Height: " + height + " meters");
        System.out.println("Initial: " + initial);
        System.out.println("Student Status: " + isStudent);
    }
}
```

```
=== PERSONAL PROFILE ===
Full Name: Jovelyn Lachica
Age: 19
Height: 1.65 meters
Initial: J
Student Status: true

[Program finished]
```
