CLASS STATISTICS CALCULATOR

```java
public class ClassStatistics {
    public static void main(String[] args) {

        int[] scores = {85, 90, 78, 92, 88, 76, 95, 84};

        int sum = 0;
        int highest = scores[0];
        int lowest = scores[0];

        for (int i = 0; i < scores.length; i++) {
            sum += scores[i];

            if (scores[i] > highest) {
                highest = scores[i];
            }

            if (scores[i] < lowest) {
                lowest = scores[i];
            }
        }

        double average = (double) sum / scores.length;

        System.out.println("=== CLASS STATISTICS ===");
        System.out.println("Number of students: " + scores.length);
        System.out.println("Total sum: " + sum);
        System.out.printf("Average score: %.2f%n", average);
        System.out.println("Highest score: " + highest);
        System.out.println("Lowest score: " + lowest);
    }
}
```

```
=== CLASS STATISTICS ===
Number of students: 8
Total sum: 688
Average score: 86.00
Highest score: 95
Lowest score: 76
