FAVORITE THINGS ARRAY

```java

public class FavoriteThings {
    public static void main(String[] args) {

        String[] favorites = {
            "Music",
            "French Fries",
            "Purple",
            "Mango",
            "Dutchmill"
        };

        System.out.println("=== FAVORITE THINGS ===");

        for (int i = 0; i < favorites.length; i++) {
            System.out.println((i + 1) + ". " + favorites[i]);
        }

        System.out.println("Total number of favorites: "
                + favorites.length);
    }
}
```

```
=== FAVORITE THINGS ===
1. Music
2. French Fries
3. Purple
4. Mango
5. Dutchmill
Total number of favorites: 5
